WINERY & CELLAR

HOME FOR PEOPLE AND WINES

www.kozlovic.hr

As a **family winery** we want to preserve the heritage and tradition of Istria and our ancestors. However we are also constantly investing in innovation and knowledge. Our winery is built at the very same spot – **Valle valley** – where the first generation planted their first hectare and built a small family house.

Today, we have modern cellar and winery with a **total surface of 2200 square meters** arranged on 3 floors, with a **stainless steel tank cellar and oak barrels cellar, laboratory and store house**. The winery is built in a sustainable way using gravity racks and plants on both the roof and the walls aiming to respect inclusion of the building into the landscape. The cellar is next to the vineyards resulting in a minimum time span between harvesting and grape pressing.

The winery and the cellar in numbers

A new winery with a cellar and tasting room was opened in 2012

The building consists of 3 floors

The winery and the cellar cover an area of 2200 square meters

A total of 40 000 m3 of material was excavated to build the foundation of the winery

5500 tons of concrete and 550 tons of iron were used during construction

A total of 1095 working days was spent building the winery and the cellar

In 2016 Paolo Basso MS presented our winery in his luxury monograph, *Sommeliers Heavens – The Greatest Wine Cellars of the World*, reviewing 66 wineries from all over the world. Our winery was the only one from Croatia.
